After an extended discussion of what transpired during the last meeting, the positions of the various speakers on Agenda Item 11, and what should be included in meeting minutes; the following action was taken:

Approved Motion: Motion to approve the minutes with the following correction: Agenda Item #11, delete paragraph 4: "Trustee Little's primary concern was his perceived judgment that Proposition D, the thirty foot height limit, would be compromised." And, per Trustee Little's handout, insert: "Trustee Little's primary concerns were as follows: 1. Allowing this variance to the 30-foot height limit that has withstood without exception for 37 years would set a terrible irreversible precedent. 2. Bishop's School failed to make the findings for a variance. Since they already have a Community and City approved permit for the building, the hardship finding could not be made. 3. To accept the recommendation of the Development Permit Review Committee: (B) Findings can be made to approve the application to add a basement to the previously approved project: 8007 Ocean Street - The project proposes a 390 square foot addition (2nd floor and 3rd floor roof top penthouse) to an existing 506 square foot single story condominium. The project is a Process 3 Hearing Officer decision for a Variance to reduce the required setbacks for the proposed addition. Project returns for consideration as the scope was modified to add a 365 sf basement, and forward the recommendation to the City of San Diego.

To accept the recommendation of the Traffic & Transportation Committee:

Opposed: Addington.

Abstain: LaCava.

Voting Record #7: Heard out of sequence because of Time Certain Agenda items.

Approved Motion: Motion:

To accept the recommendation of the Development Permit Review Committee: (A) To deny the project: 1. Findings cannot be made for a Variance. The decision to subdivide the property, request a Variance, to accommodate two homes is a situation of the property owner's own making, and not a hardship unique to the property. 2. The Project's Bulk and Scale would not promote good design with respect to visual harmony in the transition from new to existing structures. 3. Findings cannot be made for a Coastal Development Permit and Tentative Parcel Map and Variance to request a 10 ft rather than a 20 ft setback as this would adversely effect the criteria for safety of the traffic conditions of the hairpin curve: 6604 Muirlands - A Coastal Development Permit, Vesting Tentative Parcel Map and Variance to demolish one existing single family residence, subdivide one parcel to create two lots and construct a new single family residence on each new lot with reduced front yard setback. The project site on a 20,456 sf. site located in the RS-1-4 Zone, and forward the recommendation to the City of San Diego.

Costello: Even with the precautions a pool should not be allowed as a leak will accelerate bluff erosion. Water would percolate to the relatively impermeable Cretaceous Layer, follow the slope to the ocean and erode the bluff as at 5322 Calumet. **Other DPR Members:** Not a problem. Project Description: On an existing single-family residence on a 0.27 acre site in the SF Zone of the La Jolla Shores Planned District, the Sensitive Coastal Overlay (Zone B), Coastal Overlay Zone (Appealable), Coastal Height Limitation, First Public Roadway, Beach Parking Impact Zone, Residential Tandem Parking Overlay. [City]
Addition of second story with three bedrooms, 3 baths and two balconies over portion of existing structure. Addition of interior stairs for access to second floor. Modification to exterior finishes and roof of existing structure underneath proposed second story. [Applicant revision from initial submission]

Seeking: Coast Development Permit (CDP) and Site Development Permit (SDP)

Project presented by: C.A. Marengo, of Marengo/Morton Architects

Clarification: City reviewer had called the addition above the garage a guest quarters due to access provided by a non-enclosed stairway. In the design presented today the stairwell is enclosed and it is no longer considered guest quarters. Therefore the parking requirements remain the same as for any single family residence, 2 parking spots.

The side setbacks are 4' on original building first floor and will not change.
The second floor steps back so the setback there becomes 6' on one side & 5' 10" on the other.
Front yd setback does not change.
The building maximum heights are 28' on one side 26.6 on other.

Bulk and scale chart was presented to the committee showing FAR within the range of nearby residences.
27.7% lot coverage (property line extends beyond sea wall)
42.3% green space including sand will not change

Committee questions:

Boyden: Q: What is the garage to sidewalk distance? A: 15'.

Schenck: Q: Does the curb cut remain the same? A: There is no expansion of parking; the city advised not to call out a front yard parking space on the plans? There is no sidewalk on this side of the street. They currently park in a 4' wide space in front plus the spaces in the garage.

Community input/questions.

Rob Whittemore:

Q. Is there a sidewalk in front of the house? A. No. Other houses don't have them.

Q. Distance of second floor addition from the seawall? A. More than 100'.

Revised plans submitted dated and submitted to the City on 10/25/2010 were given to the committee.

Motion: John Schenck Second: Ed Furtek

Findings can be made for project, plans as submitted to city dated 10/25/2010.

B. 1900 Spindrift

- PROJECT NUMBER: 216073
- TYPE OF STRUCTURE: Existing Single family residential
- LOCATION: 1900 Spindrift Drive
- Project Manager: Glenn Gargas: Ph: 619-446-5142; ggargas@sandiego.gov
- OWNERS REP: Lisa Kriedeman; 858-459-9291; lkriedeman@islandarch.com

Project Description: Construction of new driveway, curb cut and aprons, re-grading of new driveway and connection to existing motor court & associated site wall reconfiguration. All excavation to remain on site (no more than 7-10 cu. yds.) [applicant]

Seeking: Neighborhood Development Permit (NDP)

Presented by: Lisa Kriedeman, Island Architects

The project proposes removing two driveways (23' & 26') (one each at 1900 and 1912 Spindrift, the one at 1912 not in this project) and creating a new driveway 12' feet wide to provide access to 1900 Spindrift and 1912 Spindrift. The plans being shown differ from what was previously submitted to the city: a planter and a fountain had been proposed along the east where there is presently a hedge. Rather than disturb the soil with excavations, the hedge will remain. The hedge will be maintained more frequently to make sure that it does not encroach on the sidewalk.

Committee Comments:

Boyden: Total encroachment into archeologically sensitive lands limited to 25%. Applicant: This project has only 5.8%.

View corridors? A. The project could trigger a CDP which could require view corridors. The city staff has reviewed and does not think that this is required. Presently, the house as at present and remaining would obstruct any view corridor that would be opened by hedge removal.

Lucas: Q. Distance of driveway to sidewalk? A. 15', and 20' to curb.

Morton: Drainage? A. Drains into existing planters. Drainage will not change.

Community input:

John Barbey, Jr. + Todd Barbey are neighbors. They see no concerns.

Sue Weissman not present but sent email with concerns on pedestrian issues (sidewalk/hedge)..

Motion: Schenck Second: Morton

Findings can be made for neighborhood development permit as presented in the plan presented, revision 10/26/10, which will be submitted to city. The street name typo on the plan has been corrected to Spindrift.

Motion carried: 5-0-1; Approve: Furtek, Naegle, Lucas, Morton, Schenck; Oppose: None; Abstain: Boyden.

Subcommittee Motion:

(Crisafi/Merten 5-1-1)

1. Findings cannot be made for a Coastal Development Permit and Site Development Permit to relocate the two historic structures because the proposal moves the cottages out of the context of the Village. 2. The cumulative scale of the surface parking lots is inconsistent with the scale of the remaining single family homes in the vicinity specifically on Cave St. and Silverado including corner where they intersect.

Landscape plans: These aren't available yet as the project has not completed a full cycle review with the city. The Long Range Planning staff asked for a preliminary project review by the planning groups before proceeding.

There is room to adjust setbacks slightly by re-arranging the buildings, depending on committee recommendations.

Setback studies: Applicant provided a commercially prepared multi-page graphic display of all properties within 300' overlaid with setback for each property. This project fronts Ardath Road, on .38 acres. There are no typical lot types within the 300 foot radius. Across Ardath/LJ Parkway there are condos and higher density homes. On the same side as this project, many properties within 300' don't front on Ardath Road. Tables were presented showing 22 properties within 300', but many of these were not directly comparable to this project site (larger parcel, condominiums, vacant lot, no street frontage...). Six properties fronting Ardath road and varying in lot size from .33 - .5 acre were selected for the comparison.

	Front	Left (east)	Right (west)	Average side
Average:	33.2	5.0	14.9	9.9
Range:	21.6-41.9	0-12.8	0-18.3	
Current house:	27.3	12.8	18.3	
Proposed:	22	5.0	7.4	

The PRC previously recommended a "hammerhead" type of turn-around for the driveway. This matter was reviewed by the LDR Transportation Reviewer who said that as this is a 2-lane residential street with a curb to curb width of 30', the Street Design Manual does not restrict backing out of the driveway. Currently the Dowdings on the west do not have a turnaround, and they back out onto the street (Beth Dowding confirmed that she has no problems doing this). There is enough space on the property to incorporate a turnaround if the committee still recommended it.

The final issue discussed was the relationship of the guest house on the west property line to the Dowding's property. Due to the slope of the lot toward the adjacent property, at 55' from the front property line, a low 23' retaining wall will be installed that extends to the rear (south) of the property. A low earthen berm will run from the retaining wall to the front of the property with the goal of directing run-off to the street and not onto the neighboring property. The distances between the proposed guest house and the Dowding house are 20' at the front and 12.5' at the rear of the guest house. There is a woodshed on the property line on the Dowding side that helps with privacy. There are windows on the west side of the guest house, but landscaping and fencing could be installed to improve the privacy.

Community Input

Arlene Powers, neighbor on east: Concerned about side of garage next to their driveway – seeing a large side of the garage while driving in would not be appealing. She also suggested making this a 2-car garage instead. *Response. This might not allow a hammerhead driveway, Three garage spaces may be desirable because of guest house*

Beth Dowding, neighbor on west: Privacy issues with the windows of guest house looking into their patio. Would like the setback increased.

Both neighbors like the project in general and think that it will be nice to have historic homes in the neighborhood. They think that the scale of the project fits well with the property size.

Board Discussion

The board discussion focused on the driveway turn-around, privacy issues on the west property line, landscaping, and the siting of the buildings in general. It was thought that the "hammerhead" type turn-around would be of value. The garage on the east side did not seem much of an issue with the board as the setback was 10' and the Power's driveway was on the other side and not their house. With a good landscape plan, the project could help mitigate some of the privacy issues. A plan showing this proposed project and the two neighboring properties would really help, and should be presented at the next review.

Much of the board discussions centered on how to do a preliminary review. The PRC is designed to review actual projects and either approve or disapprove based on how they fit the Municipal Code, the LJ Community Plan and the LJ Shores PDO. It was felt that we could not make any recommendations per se, only present a motion which lists reasons to approve/deny.

Lucas: This project has not been through the cycle review and the plans are not final; the project can't really be approved at this time.

Motion Merten:

That the relocation of the historic structures to this site be denied, because the movement to the site is not compatible with the LJ Community Plan.
